Random House USA Inc, United States, 2013. Paperback. Book Condition: New. 175 x 107 mm. Language: English . Brand New Book. Deep-earth adventure, scintillating science, and cutthroat intrigue collide with thrilling results that left me breathless and awed. . . . Truly impressive. --James Rollins Burned by her own government in a trumped-up scandal, brilliant microbiologist Hallie Leland swore she d never return to the world of cutting-edge science and dangerous secrets. But a shocking summons from the White House changes all that. A mysterious epidemic is killing American soldiers in Afghanistan--and poised for outbreak in the United States and beyond. Without the ultrarare organism needed to create an antidote, millions will die. Hallie knows more about Moonmilk than anyone--but it can be found only at the bottom of the deepest cave on Earth. To get there, she and her team of experts must brave a forbidding Mexican jungle crawling with drug cartels, federales, and murderous locals. And in the supercave await far greater terrors: flooded tunnels, acid lakes, bottomless chasms, mind-warping blackness--and a cunning assassin with orders to make the mission a journey of no return. Just like the perilous cave that serves as its backdrop, this story is dark and terrifying--but with a light at its end. The book should come shrink-wrapped with a seat belt. --Steve Berry Brings a new meaning to frightening. --The Star-Ledger Don t miss James M. Tabor s short story Lethal Expedition and a sneak peek of his new novel, Frozen Solid, in the back of the book.
